

GENERAL AFFAIRS MANAGEMENT SYSTEM (GAMS) PROPOSAL

1. Introduction

This proposal presents the design and development of a General Affairs Management System (GAMS) to digitalize administrative operations including officer management, attendance, missions, and invitations.

2. Objectives

- Improve efficiency and transparency
- Centralize administrative data
- Provide secure access and reporting

3. Functional Requirements

- Officer Management
- Attendance Management
- Mission and Invitation Management
- Dashboard Visualization
- Reporting

4. Security Requirements

- JWT Authentication
- Role-Based Access Control
- Encrypted passwords
- Audit logs

5. System Design

The system uses a web-based architecture with secure API communication and centralized database management.

6. Conclusion

The GAMS will significantly enhance administrative efficiency and decision-making.
